10 Southwell Gardens London SW
26 Feb.

Your card of 13th reaches me only today - I am annoyed at the parcel having been left behind at Kew - & shall if pobible go to morrow & take it away & forward through Wesley - 'Out of sight out of mind' - Since I was laid up in Jan. I have been only once to Kew - but I renewed the request to have any parcel forwarded - I dont know how you are off for S. american plants - Have you corresponded with Hieronymus & Philippi - I have received a very fine set from the former from which I may be able to send you some duplicates if you are not likely to have them - I am also expecting a large lot from Philippi but he sends very sparingly & I dont expect duplicates - The supplement & indices arrived a few days ago & are most welcome - I renew my thanks - I shall have another little S. American paper to send you soon

Ever yrs JD

Professor Langley - I suppose the ____ astronomer of that name - has published a memoir on the absorption of Solar heat by the atmosphere which I much want but dont know to procure it Do you know him & would you ask him to send it?
